EDUCATION

Carleton University

Ottawa, Ontario

Bachelor of Engineering, Software Engineering (Co-op) — 3rd Year

Expected Graduation: April 2027

Relevant Courses: Algorithms and Data Structures, Imperative Programming, Computer Architecture, Software Design, Operating Systems, Software Requirements Engineering, Advanced C++ Programming

SKILLS

Languages: C, C++, Python, Java, JavaScript/TS, Go, Lua

Technologies: GTest, Boost, JAX, React, Gin, Redis, PostgreSQL, GCP, Apptainer, Docker

Development Tools: Git, Bash, CMake, Github Actions, Gitlab, VS Code, JetBrains Suite, Atlassian Suite

RELEVANT WORK EXPERIENCE

Software Developer

May 2025 – December 2025

Searidge Technologies

Ottawa, ON / Hybrid

- Participated in code reviews using GitLab, following best practices for code quality, maintainability, and security.
- Gained experience with GTest, Boost, CUDA, Kafka, Kubernetes, and SonarCloud in software development.
- Maintained documentation and technical research in Confluence to support knowledge sharing and decisions.
- Developed and maintained mission-critical C++ software for intelligent airport systems, ensuring high reliability and performance in real-time environments while following Agile methodologies.

Bioinformatics Software Developer

Jan 2025 – Apr 2025

Agriculture and Agri-Food Canada (AAFC)

Ottawa, ON / Hybrid

- Developed Nextflow bioinformatics pipelines on the 2 most powerful supercomputers in Canada via SLURM.
- Engineered an in-house solution to deploy Ollama via Apptainer on 8x A100 GPUs, enabling flexible LLM deployment across any number of GPUs (2-7) instead of the previous limitation of 1 or all 8 GPUs.

Junior Software Developer

May 2024 – Aug 2024

James Evan & Associates (JEA)

British Columbia / Remote

- Migrated enzyme-react-adapter to React Testing Library, updating and maintaining over 400 tests with Jest.
- Upgraded core dependencies and runtime environments, managing breaking changes, deprecated features, and internal API modifications to ensure integration with CI/CD pipelines in Jenkins.

OTHER WORK EXPERIENCE

Undergraduate ML Researcher

May 2024 – Present

Carleton University

Ottawa, ON

- Co-authored “LookWhere? Efficient Visual Recognition by Learning Where to Look and What to See from Self-Supervision,” submitted to [NeurIPS 2025](#)
- Enabled large-scale Vision Transformer (ViT) training by adapting a JAX/Flax codebase for Google Cloud TPUv4 pods, leading the team to secure Google’s TPU Research Cloud (TRC) resources.

Vice President of Technology & Projects

Sept 2024 – Present

Carleton Artificial Intelligence Society

Ottawa, ON

- Reestablished the club, led a community project, and grew membership to over 50 active members.

Teaching Assistant – Digital Systems

Sept 2024 – December 2024

Carleton University

Ottawa, ON

- Facilitated labs, graded assignments, and supported students with course material and inquiries.

PROJECTS

Vibecheck: Tweet Guessing Game | *Go, Redis, PostgreSQL, Gin, Docker, React*

- Developed a full-stack web app with CRUD operations on 30k twitter tweets and extended the RESTful API to include a party guessing game for users to guess the vibe of a tweet, accessible via a frontend.

TEmbedded Systems: MSP432 Microcontroller | *C, Real-Time Systems*

- Developed embedded systems projects leveraging MSP432 microcontroller capabilities, implementing UART, interrupts, timers, GPIO, ADC, PWM, and concurrency/synchronization using QNX real-time OS.
